

Trap the Grease: Range Kleen Fat Trapper

The Village of Ashville's sanitary sewer system includes all the infrastructure (sewer pipes, lift stations, manholes) that are designed to carry municipal sewage to the wastewater treatment plant.

Proper use of the sanitary sewer by **all residents** is important for maintaining an efficient and functional system. Clogs and sewer overflows, most often caused by the flushing or dumping of unauthorized materials into toilets and drains, increase maintenance costs for everyone. Fortunately, most clogs and sewer overflows are 100% preventable.

HERE'S HOW YOU CAN HELP

1) Do not put grease down your drain.

The Village has acquired a fat trapper and is making it available to residents. One is allowed per household. Replacements are available at the local Ace Hardware. The Disposable Bags are also available at Ace Hardware.

2943 St.Rt. Ste. A. Item # 6027596 MFR # 6000-02

Bags Item # 6027597 Mfr # 65105 or 65110

2) Product Description.

Did you know you should never pour kitchen fat, oils, or grease down the drain? When fat, oil, and grease are poured into drainage systems, the FOG (kitchen fat, oils, and grease) congeals and can form blockages in your plumbing system.

Did you know you can responsibly dispose of FOG with Trap The Grease: The Fat Trapper® system? Prevent costly plumbing repairs by disposing of your grease properly. Simply pour cooled cooking grease into the bag and replace the lid. When the bag is full remove it from the container, fold the bag closed, lock tabs, and discard.

- Trap the Grease: Fat Trapper® System includes one container and two bags.
- Bags temperature safe to 200°F.
- The sleek, black Trap the Grease container is made of polypropylene and recycled materials.
- Container is made in the USA.
- Container is #5 recyclable ♻️.
- The improved bag style is easier to use and has a better fit. Bags can be used with or without the container.
- Bags are constructed from polyethylene, aluminum, white kraft paper, and polypropylene.
- Bags are re-sealable and re-closeable.
- Bags hold 2.75 cups (22 ounces) .
- Locking bag tab contains FOG and odors between uses.

Instructions

Step 1: Always pour FOG (fats, oils, & grease) into this bag

Step 2: After pouring FOG into Bag, wipe the pan thoroughly with a paper towel.

Step 3: Rinse the pan under cold water. This will help solidify any residual FOG, so it can be wiped again before cleaning.

WHEN BAG IS FULL:

Step 4: Fold the top & fasten with tie that is attached or press & seal.

Step 5: Dispose of Bag in a trash can without mess.
