Recycle and Refuse Information Update

First, I would like to thank you for stepping-up and providing our community a significant increase in recycling. When we began recycling in 2015, we started at an average of 6.52 tons per month. In April we had 21.79 tons with an average for 2018 of 17.375 tons.

We still have an average of 148.53 tons of refuse for 2018. That average is less than the average in 2016 and 2017. These numbers are even better because it includes an increase in population.

With that amount of tonnage it is still possible to expand recycling. At some point in time it would be nice to have recycling to exceed refuse.

One partner to this process is a group lead by Jessica J. Holes, Biology & Environmental Science Teacher at Teays Valley High School. Our February 2018, has a front page article on their program.

The containers that were provided last year are making it easier to collect recycling. Please continue to make use

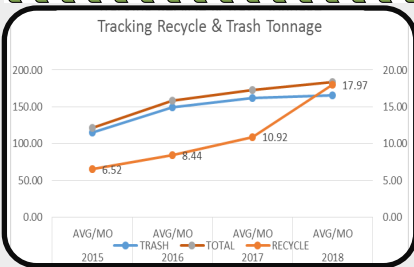

of these containers. It has come to our attention that these containers have been taken from some locations. While the toter is part of the Local Waste Services (LWS) Agreement to provide, the toter still belong to LWS. If they become missing our recommendation is to file a Police Report and file a claim with your renters or home owners insurance company.

Each container has a unique number assigned. We suggest recording that number.

If you provide us that number we can add it to your billing profile. Call 740/983-6367, email www.ashvilleohio@ashvilleohio.gov or write it on your return bill.

We have a new LWS representative: Nicole M. Rogue Customer Service Manager Office. 614-409-9375-Option 2 Fax. 614-409-9376 Website: www.localwasteservices.com 1300 S. Columbus Airport Rd. Columbus, OH 43207 Email: request@localwasteservices.com

Information about the Ashville Food Pantry

On May 17, 2018 the 4th annual Viking 5K run/walk at Scioto Elementary and West Middle School generated **\$6,537** for the Ashville Food Pantry. Students in grades 3, 4, 5, and 7 participated along with their family members.

The Ashville Food Pantry provides food, free of charge, to those in need who live in the Teays Valley Local School District. The food pantry is currently seeing a large increase in the number of food bags needed for families and school aged children. They also are in need of funds to maintain their facility and keep their programs running strong. This events goal was to present a meaningful donation to this organization while uniting our community in a fun way that promotes health and well being.

They are located at 94 Long Street and their most needed items are: Macaroni & Cheese, Tuna Fish, Canned Vegetables, Fruit, & Spaghetti Sauce, Vienna Sausages

Debt Service Fee

In addition to the base rate of \$7.29, there is an I & I fee for 34¢ and a debt services fee. We began collecting for payment of the Water Resource Recovery Facility in 2014. It has increased each year to accumulate funds for payment of the OWDA and OPWC Loans. The replacement of the facility was mandated by the OhioEPA through "Findings and Orders". The table below represents Sanitary charges. You can find more information about I & I and debt service on our website ashvilleohio.gov and go to "Department -Utility".

Per 1000 Gallons Rate	Wastewater Service Billing Breakdown				
	I & I	Current Debt Service	New Debt Service	Inside Village Total	Outside Village Total
\$7.29	34¢	\$2.63+\$1.40=	\$4.03	\$11.66	\$23.32

A Word from The Water Resource Recovery Facility

Now that the facility is fully operational the Utility Department will concentrate on the Collection System. Two Items will be a focus:

- ⇒ Infiltration & Inflow (I&I)-I & I is clean storm and/or groundwater that enters the sewer system through cracked pipes, leaky manholes, or improperly connected storm drains, down spouts and sump pumps. Most inflow comes from storm water (rain) and most infiltration comes from groundwater. I & I affects the size of the Village of Ashville's delivery and treatment systems and, ultimately, the rate businesses and residents pay to operate and maintain them. The OhioEPA expects us to work on I & I and we need to reduce I & I to maximize the potential of our new facility that cost over 15 million to construct.
- ⇒ Solid Material in the Collection System-Not all items that enter the system can be processed easily.
 - Grease is always discouraged.. While it may be a liquid state when warm, when it cools it can get as hard as concrete, see picture to the right. Let it cool and throw it in the trash. It cost thousands to clear a pipe.
 - The second item is cloth or paper that will not separate when wet. Flushable wipes including tampons, sanitary napkins and paper towels clog sewer pumps and pipes, The phenomenon, is called "ragging", means that screens and pumps in wastewater systems are getting clogged with flushable wipes that might be flushable, but are not biodegradable. These wipes are "wreaking havoc" with pumps in the system. Wastewater officials are urging you to flush only toilet paper — nothing else — down with the human waste.
